Experience

Web Developer(Freelance)

Jan 2025 - Feb 2025

Krishna Velvet

Remote

- Designed and maintained landing page for the client built using Bootstrap, serving 1200+ daily visitors.
- Integrated contact us form in website to automatically send email alerts for form entry, resulting in 20% revenue growth.

Software Enginer(Contractual)

Feb 2023 - Aug 2024

GeekCliq Pvt Ltd.

Surat, India

- Crafted custom CRM system to centralize client and product data management for 10+ internal users.
- Leveraged Django panels and Flask with MySQL for REST apis and backend services, resulting in 40% increased productivity for client.

Software Trainee

May 2019 – July 2019

D-Link India Ltd.

Mumbai, India

- Designed and implemented a microsite named "D-Link GeM Chatbot Platform" to assist D-Link resellers with collection of information about relevant products.
- Collaborated with peers to create a web portal and chatbot leveraging Python and JavaScript to fetch and display 200+ product information to resellers for inputs.
- Built Reward system to reward top-performing resellers and able to attract 20% more resellers.

Technical Skills

Programming: Python, JavaScript, SQL, Golang, Kotlin

Tools/Platforms: Jupyterlab, MySQL, MongoDB, Docker, Git, AWS, Google Colab, Postman, VSCode

Libraries/Framworks: Flask, Pytorch, NumPy, Pandas, Scikit-learn, Matplotlib, Transformer, ReactJS, Node.js

Projects

Tiktok Scrapper | Python, Flask, BeautifulSoup, Playwright, Docker

Feb 2024 – Feb 2024

- Created a small project given to me as a coding challenge to scrap fashion data from Tiktok for analytics.
- Produced Flask application in Python to implement scrapper with Playwright and containerise it using Docker.

Restaurant Risk Prediction | Python, Pandas, Matplotlib, Scikit-learn

Nov 2022 - Dec 2022

- Implemented capstone project for Machine Learning subject regarding prediction of restaurant risk category.
- Collaborated with team of 4 in preprocessing, analysis and visualization of dataset also creation and comparision of different ML models, achieved 97% accuracy on dataset.

Corona Symptoms Detection Chatbot | Python, Flask, Spark, Socket.io

Apr 2022 - May 2022

- Conceptualized and developed a project, solving problem of Detecting Covid-19 Symptoms deploying Chatbot.
- Led team of 3 with training of ML model and deployment of chatbot using Flask for backend and JavaScript for frontend.
- Demonstrated project in front of whole class and got feedback on functionality and improvements for future.

Chatbot as a Service | Python, Flask, Django, Transformers, Socket.io

Nov 2019 – Apr 2020

- Developed bachelor's final year project to generate chatbots for business specific usecases.
- Collaborated with team of 3 in formation of service framework to create and integrate chatbots to business websites.
- Utilized DistilledBERT model for chatbots, Django for frontend panel and Flask with MySQL for the backend services.

Education

Master of Science in Data Analytics

Jan 2022 - Dec 2022

San Jose State University

San Jose, California

Bachelor of Engineering in Computer Engineering

July 2016 - Aug 2020

Gujarat Technological University

Gujarat, India

Activities

Community Lead

Jan 2019 – Aug 2020

Developer Students Club RNGPIT

Gujarat, India

- Organized 10+ seminars and workshops to educate students about various technologies that industries require.
- Administered activities of GDSC club in college and responsibly give efforts for smooth running of events.
- Tutored and mentored 100+ students and professors to build knowledge about current technologies.
